

H2M installs photovoltaic panels for Greenlawn Water District

May 26, 2010 - Spotlights

The mechanical, electrical & plumbing (MEP) department at H2M completed the installation of photovoltaic panels for the Greenlawn Water District.

The board of commissioners of the Greenlawn Water District decided to include a "green" component to their new wellhead treatment project. H2M included the installation of photovoltaic panels on the roof of Plant Number 11. The photovoltaic design consisted of a 6 KW system which qualified for a LIPA rebate of \$27,000. This system is expected to reduce the district's electric bills by \$1,500 per year.
