

The Par Group appointments Skidell as managing director of Par Green Solutions

August 11, 2010 - Green Buildings

The Par Group has appointed Neil Skidell as managing director of Par Green Solutions.

Skidell brings over 20 years of experience in the development of forward thinking, environmentally responsible projects to his role. As a mechanical engineer, he has spent extensive time developing power and cogeneration plants as well as strategic energy management projects in the U.S., Europe, Asia, South America and the Caribbean. Skidell has experience in all energy systems and spent 10 years at the engineering firm of Jaros, Baum & Bolles. Most recently he was part of the commissioning team at 1 Bryant Park, and he is a member of the American Society of Heating, Air Conditioning and Refrigeration Engineers, the Association of Energy Engineers and the U.S. Green Building Council.

"This new division enables us to help our clients reduce their energy and water consumption, which will reduce costs as well as reduce their carbon footprint, comply with new legislation, obtain available grants, rebates and tax incentives and position their buildings as energy efficient and sustainable," said David Levine, Principal of The Par Group.

"Neil has worked on designing, developing and commissioning high performance building systems for over two decades," said Levine. His extensive knowledge of HVAC, plumbing and electrical systems will provide tremendous benefit to our clients as they navigate the inevitable transition of existing buildings from inefficient energy consumers designed in a different era to high performance buildings."

"Par Green Solutions builds on the internal capabilities of the Par Group to deliver projects utilizing a seamless turn-key process. All services and trades required to successfully complete each project we undertake are provided under the Par umbrella with the building owner having a single point of contact," said Mr. Skidell. "By integrating front-end analyses and green building consulting services into a turn-key integrated project delivery methodology we deliver the highest quality service at the lowest overall cost helping our clients save money"
