

P.W. Grosser Consulting named one of top CE firms to work for

October 25, 2010 - Long Island

According to Stagnito Media in collaboration with ZweigWhite, P.W. Grosser Consulting (PWGC) was named one of the top 35 in "CE News Best Civil Engineering Firms To Work For 2010."

Coming in at number seven, PWGC's founder Dr. Paul Grosser, PE takes pride stating "I am delighted to see the company excel during this tough economic environment."

Since inception in 1990, Grosser established a corporate culture like no other for his employees and this industry ranking award acknowledges his efforts and foresight to know that the success of the company relies on the employees. Solidifying his approach, CE News names PWGC as an outstanding employer selecting them for their commitment to their employees in providing a work environment that is positive, challenging and interesting; giving them opportunities to succeed, and for achieving high levels of employee satisfaction through a very generous benefit package, flexible and friendly culture.

The annual survey conducted by CE News magazine is quite unusual: Each firm is rated by their own employees. Employees provide feedback on their work environment, training and mentoring programs, internal communication, culture, insurance and fringe benefits, and compensation and bonus practices. Other metrics for the survey include: total billings during the last five years, turnover rates, history of downsizing events.

Deanna Lantieri, director of human resources from PWGC was present to accept the award and said, "We are honored to rank in the Top 35 and pleased with the pride our employees have working at PWGC."

Stagnito Media is the leading resource for civil engineers, structural engineers, and architects. Stagnito Media produces the Best Firms to Work for Summit; publishes CE News (a monthly business-to-business magazine serving the civil engineering and land surveying markets), Structural Engineering & Design, and Rebuilding America's Infrastructure magazines; and encompasses a complete integrated media platform, including electronic media, events, and custom media.
