

## **Corporate Profiles: Roux Associates**

May 23, 2011 - Long Island

Roux Associates is a professional services firm providing a broad range of consulting and project management services to solve complex environmental, health, and safety problems associated with air, water, land, and interior pollution; hazardous materials; and toxic waste treatment and disposal. Roux Associates has built an organization with a high level of sophisticated professional skills and a broad range of scientific, technical and managerial resources. These skills and resources are required to develop and implement effective, efficient, long-term solutions to complex existing problems, as well as avoid future problems. Roux Associates utilizes all of the appropriate scientific, engineering, and management disciplines in a technically integrated approach.

Founded over 28 years ago, Roux Associates is recognized for being highly effective and client-focused. From the beginning, our work involved large complex environmental remediation projects, including Superfund sites, chemical and manufacturing plants, and petroleum refineries and distribution terminals. Today, we are an employee-owned company with over 250 environmental professionals in a variety of science and engineering disciplines, providing a mixture of traditional environmental site remediation and compliance services, as well as cutting-edge technical solutions. Our strong history with major Superfund, RCRA, and other regulatory-driven projects is now being applied to some of the most complex Brownfield redevelopment projects in the United States. Moreover, our innovative Engineered Natural Systems (ENS)<sup>®</sup> technologies are being employed in remediation, stormwater runoff, and restoration projects in a cost-effective and sustainable fashion.
