

Charles Merritt of Merritt Engineering Consultants, P.C.

December 26, 2011 - Spotlights

What are your resolutions for 2012?

In an effort to provide a one-stop, comprehensive engineering consulting service, Merritt Engineering is launching its mechanical/electrical/ plumbing (MEP) division. This new division will offer clients consulting and design services for heating, ventilation, air-conditioning, electrical, plumbing, and fire-protection systems that make up the infrastructure of a building. We're very excited about this extension to our current line of engineering services, and we look forward to providing our clients with a more versatile and dynamic range of cost-effective, practical design solutions.
