

## **EnTech Digital honored by ConEdison**

March 26, 2012 - Green Buildings

EnTech Digital Controls has been chosen as Contractor of the Year: Heating for participating in Con Edison's Multi-Family Energy Efficiency Program and delivering the largest volume of rebates to its residential customers who participated in the program.

"We are extremely proud to receive an honor of this caliber," said Sol Levy, VP of sales for EnTech. "Our goal is to provide property owners and managements with financial and energy savings. This rebate allowed us to do so in twofold - customers saved off the total cost of the Virtual Remote 500, as well as benefited from the savings the system has to offer."

The company, celebrating 15 years in business, is known for their Energy Management Service, providing building owners with hands-on heat control and allowing them to dramatically reduce excessive fuel consumption.
