

Horizon Engineering Associates hires Watson as director of field services

June 25, 2012 - Green Buildings

Horizon Engineering Associates, LLP (HEA), a professional engineering firm specializing in commissioning, energy consulting and LEED services, has hired Daniel Watson, LEED GA as the director of field services. Watson will manage, support and provide direction and leadership to engineers within the N.Y.C. and Long Island offices. His background includes previously serving as senior engineer at HEA and additional roles at other firms such as commissioning manager, building manager and chief engineer. HEA is enthusiastic he will be a natural fit within the company due to his commissioning knowledge and experience.

"We continue to see rapid growth in N.Y. as we drive forward efforts with PlaNYC and our mission to ensure people live and work in buildings that operate correctly and are energy efficient. Our momentum and presence is attracting great people and I'm thrilled to welcome Dan back to our organization," said Michael English, PE, CCP, LEED AP, senior partner of HEA.

Watson holds a Bachelors of Engineering degree from SUNY Maritime College where he specialized in Marine Engineering.

He has obtained various certifications including: LEED Green Associate, New York City Department of Building High Pressure Steam Stationary Engineer, New York City Fire Department Certificate of Qualification for Refrigeration Systems Operator, New York City Fire Department Certificate of Fitness for Fire Safety Director and EPA Approved Universal Technician Certification.

About Horizon Engineering Associates, LLP

HEA is the nation's premier commissioning firm that uses a collaborative hands on approach to deliver innovative solutions to our clients. Headquartered in New York City, with 12 additional offices across the nation, HEA has one of the largest and most respected staffs dedicated to providing commissioning services for new construction and existing buildings for more than 90 million square feet, worth over \$20 billion in construction cost.
