

Seesmart completes \$140,000 LED lighting

November 26, 2012 - Green Buildings

LED lighting manufacturer Seesmart Technologies, Inc. has completed a \$140,000 project with Cerebral Palsy Associations of NYS that will help the organization's new West Farms Center achieve LEED design certification.

After comparing costs with T-5 fluorescent tubes, the center found that Seesmart LEDs would save more than \$100,000 in installation costs alone, in addition to \$25,000 a year in energy savings.

"Installing LED lighting in new construction projects is the best way for facilities to see the highest return on investment over the life of the building," said Ray Sjolseth, president of Seesmart. "We were happy to help Cerebral Palsy Associations of NYS save thousands on energy and maintenance costs in its West Farms Center facility."

Cerebral Palsy Associations of NYS is a multi-service organization providing support and services for more than 100,000 individuals with cerebral palsy and developmental disabilities and their families. Its Metropolitan Division, which serves all five boroughs of New York City, recently opened the new West Farms Center at 1880 Bryant Ave.

To aid the facility in its sustainability goals, Seesmart installed 2,000 LED tube lights, which will save the center 66% in energy costs - or \$2,100 a month - compared to fluorescent lighting.

"Cerebral Palsy Associations of New York State is dedicated to using all means available to be as energy efficient as possible," said Ellen Traks, Vice President of Facilities Planning, Development and Construction for Cerebral Palsy Associations of New York State. "Along with a building management system, occupancy sensors and automatic window shades, Seesmart Technologies LED lighting was a natural choice to continue our commitment to sustainability."

The areas that will see the benefits of LED lighting include exam rooms, rehabilitation rooms, offices, soffits, hallways and waiting rooms. The new 51,000-square-foot building offers day opportunities, medical and rehabilitation services and an enhanced curriculum of support and program services for individuals with physical and/or developmental disabilities and the entire community.
