

Tabone named director of permitting at Bohler Engineering

January 14, 2013 - Long Island

Thomas Tabone joined Bohler Engineering as director of permitting. With 15 years' experience in permit expediting and building code consulting, Tabone will lead and continue to grow Bohler's permitting services throughout the New York Metro area.

Tabone comes to Bohler from Milrose Consultants where he was a Regional Manager, responsible for overseeing permitting projects throughout Long Island, New York City, Westchester and Fairfield County, CT. With an extensive background in navigating the complexities of regulatory agencies, Tabone is now responsible for the management and leadership of Bohler's permitting department for the New York Metro Region. In an effort to maintain Bohler's success with the timely approvals of development projects, his focus will be ensuring continual communication between clients, project teams and municipal agencies.

"We are very excited to have Tom on board," said Joe Deal, PE, principal of Bohler Engineering. "His permitting experience and relationships with agencies strengthens our already well-established team, allowing us to further expand our reach and provide exceptional value to our clients."

In addition to his new role with Bohler, Tabone is an executive board member and global representative for CoreNet and serves on the associate board of the Association for a Better Long Island. Additionally, Tabone is involved in charities and fundraising efforts for Big Brothers Big Sisters, Covenant House and Make-A-Wish foundations.

Bohler Engineering provides civil and consulting engineering services from 13 offices throughout the Eastern United States. Our design professionals assist clients in navigating the land development process from site evaluation and due diligence through approvals and project completion. Bohler Engineering's services include site civil and consulting engineering, land surveying, program management, landscape architecture, sustainable design, permitting, transportation services, geotechnical engineering and environmental consulting.
