

Web Design & Dev. Co. finding technological solutions for Real Estate

May 05, 2008 - Front Section

While the real estate market has been in a state of flux, CIS One, a web development and design company is finding technological solutions for real estate brokers to increase marketability and online branding during a period of housing finance turmoil.

Providing an integrated, easily manageable, and marketing centric solution for dynamic content management websites, CIS One releases its Real Estate Broker Enterprise Website Framework Solution version 2. The core of the website framework is a Content Management System (CMS) that allows real estate brokers and realtor's to add, modify, delete, and manage all website content pages, including images, videos, links, listings, agent profiles, and PDF files.
