

GeoData Plus offers Nassau Pro Package

July 13, 2015 - Long Island

GeoData Plus is now offering a new package including s/f per floor, rent rolls, special building features, and external improvements for the 40,000 commercial properties in Nassau County. These properties are home to thousands of residential complexes, office buildings, and retail stores.

"There's over 250 million s/f of commercial space in Nassau County," said Erik Wind, president of GeoData Plus. "And up until now, no one has made rent rolls and building details on these properties publicly available."

This commercial property data is part of a new bundle GeoData is calling the Nassau Pro Package. The Pro Package includes access to the abundance of commercial properties in addition to Nassau County zoning data and maps. GeoData is the only organization in the world with its own complete zoning map for Nassau County. Customers who have already purchased access to Nassau zoning information have been upgraded automatically to the new Nassau Pro Package at no additional charge.

Below is a link to a sample report that shows all of the new features described. Please note that specific financial numbers have been shaded out, but subscribing customers are able to see this information.

Parties interested in this package, or any other property data published by GeoData Plus, can email info@geodataplus.com or call 516-663-0790. GeoData Plus also offers access to its service risk-free for 30 days, allowing customers to see how much their information can help a real estate practitioner's business.

GeoData Plus is a data source used and trusted by thousands of real estate practitioners throughout N.Y. and N.J. GeoData's clients are appraisers, real estate agents, investors, mortgage companies and tax reduction firms. Information available in GeoData Plus includes detailed property reports, sales comparables, foreclosures, mortgages, for sale/for rent listings and maps. GeoData started in 2000 as desktop application used by a small number of appraisers and property tax reduction firms. It has since evolved into a web-based application used by thousands of real estate professionals.
