

Mojo Stumer designs Elwood Public Library

June 06, 2017 - Long Island

Huntington, NY Mojo Stumer Associates is designing a new space for the Elwood Public Library.

Still in the design phase, a slate wall screen system will be installed with a two-story floating high volume of chemical glass revealing the primary staircase within the space. An outdoor terrace will look over a green area, which is part of a reserve. Natural light will be abundant throughout the new facility which will be the anchor in a new commercial development zone.
