

Tempco Glass now to offer complete shower enclosure packages

July 16, 2019 - Design / Build

Queens, NY Tempco Glass Fabrication has made a full line of hardware to complement its existing frameless shower glass offerings available to glaziers, glass installers, and contractors. For a basic residential frameless shower door, a custom shower enclosure for an upscale property, or hundreds of glass shower doors or screens for a multifamily or hotel building, Tempco can supply the complete package.

The new proprietary design of etched Tempco logo frameless shower hardware includes a selection of wall-to-glass and glass-to-glass hinges, fixed panel clamps, wall mount brackets, and two sizes of tubular back-to-back pull handles. Door and glass seals and sweeps are also available. The new hardware is offered in either chrome finish or polished nickel.

In addition, Tempco will also supply a frameless sliding glass shower door hardware kit. The kit comes complete with 72" top header bar, 4-roller system, pulls and seals. The sliding hardware is available in either a stainless steel or brass plated finish.

The new frameless shower hardware complements Tempco's currently available quality shower glass panels. Tempco's production facility fabricates 3/8" and 1/2" thick tempered glass with notching, cut-outs, and drilled holes, in sizes suitable for virtually all frameless or framed shower enclosure applications. Shower glass options include obscured, acid-etching, digital design printing, and color-tinting.
