

Nelson + Pope welcomes Taylor and Owen

May 04, 2021 - Long Island

Karen Taylor

Pilar Owen

Melville, NY Engineering, architecture and surveying firm Nelson + Pope welcomed two new employees to the firm, Karen Taylor and Pilar Owen.

Taylor has over 30 years of experience and is formally of the New York State Department of Transportation where she specialized in traffic signal design and highway work permits. Her expertise and background include regulatory knowledge of the MUTCD, ADA standards, the NYSDOT Highway Design Manual, civil engineering design of highways and appurtenances,

stormwater drainage, review of plans and traffic impact studies. Taylor earned her Bachelor of Civil Engineering from Pratt Institute in Brooklyn. As senior engineer in Nelson + Pope's Transportation Department Taylor will provide technical design, oversight and review of traffic signal and roadway improvement infrastructure projects.

Owen has over 15 years of experience in both field and office surveying where she has been responsible for the preparation of property surveys, topographic and utility mapping, as-built and ALTA surveys. Owen earned her bachelor's degree in Geology from City University of New York at Queens College. As project manager in N+P's Survey Department Pilar will help organize, manage and review work done by field and office personnel. Owen will assist in solving any issues during the entire project development process making sure projects are submitted to their clients accurately and within their designated time frame.
