

WIDOPAN launches liquid waterproofing business

July 06, 2021 - Owners Developers & Managers

Niagara Falls, NY The North American construction industry has a new source for liquid waterproofing systems. WIDOPAN America has opened for business, offering a wide range of liquid waterproofing systems for roofs, balconies, structural components and other applications.

“We provide our customers with just the right solutions to meet their needs and building requirements,” said WIDOPAN America president and CEO Richard Doornink. “Plus, we respond promptly and effectively to them, offering the capabilities necessary to make their buildings and structures watertight whatever the application.”

WIDOPAN America is based in a new 33,000 s/f production facility in Upstate.

“Our new headquarters features up-to-date technology, four laboratories, clean rooms, a demonstration room and an installer training center,” he said. “The training center will be instrumental in ensuring that WIDOPAN systems are applied by experienced and expert installers.”

WIDOPAN America offers cold-applied liquid waterproofing systems for all types of flat roof; trafficable systems for parking lots, ramps & bridges; and flexible, self-levelling systems for balconies. The company also produces and markets fully bonded systems for problematic areas, connections and upstands; expansion joint systems for ceilings, walls and floors; plus interiors and special applications.

WIDOPAN waterproofing systems combine unsaturated polyester resins, polyurethanes and methyl methacrylates with fleece, fabric or fiber reinforcements. They are solvent-free, durable, single- or multi-component, flexible, and resistant to chemicals and aging.
