

## **Gamco offers CW250P curtain wall system**

September 07, 2021 - Owners Developers & Managers

Queens, NY Gamco Corp., a leading NY-area fabricator of fenestration and architectural metals, is offering a new curtain wall system capable of meeting energy efficient applications. Gamco's new CW250P, the improved version of the popular 2-½" sightline aluminum curtain wall system, provides significantly better thermal performance than its predecessor. Utilizing a polyamide structural pressure bar which creates an extremely effective thermal break, the new curtain wall delivers 20% U-value improvement and, with certain insulated glass packages, is capable of U-values as low as 0.34 or even an incredible 0.21.

The new pressure bar, German designed and manufactured in the USA, is composed of environmentally friendly polyamide material utilizing 40% glass fiber reinforcement. It has low thermal conductivity yet is incredibly strong and outperforms both aluminum and fiberglass pressure bar alternatives.

"The new thermally improved Gamco CW250P is the perfect choice for discriminating architects, builders, fenestration specialty subcontractors, and glaziers," said Davidson Chen, sales manager for Gamco Corporation. "It is the first of many new products that affirm Gamco's commitment to energy efficiency."

In addition to improved U-values, the new Gamco CW250P Curtain Wall offers enhanced Condensation Resistance Factors (CRF) for both frame and glass.

The CW250P, like all Gamco products, combines high-quality construction, outstanding design, optimum performance, and flexibility. The 2-½" CW250P, a stick-built system with concealed fasteners, is available in three back member frame depth sizes: 2-?", 3-?", and 5-½". All accept 1" to 1-1/4" glazing. The CW250P is compatible with Gamco Entrance and Window Systems as well as other manufacturers' windows and doors.

Standard finishes for the Gamco CW250P are Clear Anodized and Dark Bronze Anodized, with other custom color finishes optional. Also, dual-tone finishes (different exterior and interior) are possible with the CW250P.
