

EcoStar offering 10-inch tiles to line of recycled, synthetic roof products

October 10, 2008 - Front Section

EcoStar has added 10-inch Majestic Slate Traditional tiles to its line of recycled, synthetic roofing products. A narrower version of EcoStar's existing 12-inch tiles, these 10-inch tiles are intended to replicate the look of standard slate tiles, which are manufactured in both 10 and 12-inch widths. The new 10-inch tiles can be used individually or in conjunction with the standard 12-inch tiles. The 10-inch tile is made of post-industrial recycled rubber and plastics, and is available in nine colors. The tiles offer a 50-year, transferable Gold Star Warranty and have a 110 mph wind warranty available.
