How do you contribute to your community or your profession?

I am proud of our continued support and participation in several local environmental events to help to educate the community about building green. It's so rewarding to see how genuinely interested people are in learning about what we do and how it affects them. While they are often not directly involved in the construction industry, these advocacy groups are doing great work to protect our planet. In fact, these grassroots organizations missions are very much aligned with what we do and sharing our knowledge can lead to people who witness concrete washout being dumped, calling their municipalities, and building inspectors.
