

Project designers Alsaedi and Latona of SWBR earn Construction Documents Technology certifications

September 26, 2023 - Design / Build

Ali Alsaedi

Sarah Latona

Rochester, NY SWBRs' project designers Ali Alsaedi and Sarah Latona earned their certification in Construction Documents Technology (CDT) from the Construction Specifications Institute.

CDT certification reflects comprehensive knowledge of managing and delivering projects from conception through occupancy. CDT professionals are highly respected for their understanding of project delivery and ability to provide effective client services and deliver successful projects.

Part of the firm's workplace studio, Alsaedi is responsible for planning, collaboration, team coordination, developing design and construction drawings, and construction administration on a variety of corporate, industrial, and municipal projects. He credits his passion for creating, designing, and problem-solving along with his adoration for aesthetics and art for drawing him to the field of architecture. Alsaedi graduated from Tambov State Technical University in Tambov, Russia and is completing his Master of Architecture at Rochester Institute of Technology.

Latona supports SWBR's Education studio with BIM design and management, project team coordination, condition assessments, and construction administration on a variety of higher education and K12 projects. She sees meaningful design as a combination of quality work and conscious choices that make a project thrive and positively impact the community it's supporting. Latona earned her Bachelor of Science in Architectural Technology from Alfred State College.
