

2023 Commercial Real Estate Visionaries: Adrian Vasile of McAlpine Contracting

November 14, 2023 - Spotlights

Adrian Vasile
Director of Construction Administration

McAlpine Contracting

Adrian has fully digitalized all of McAlpine's processes. In addition, he continuously supports project management teams with his design and construction expertise. Most recently, Adrian resolved concerns of several medical practices neighboring McAlpine's interior fit-out for Macklowe Properties by re-routing MEP systems to minimize disruptions outside of the project site.

What recent project, transaction, or accomplishment are you most proud of?

I am very proud of the McAlpine team's work at the recently completed 9,000 s/f, two-story veterinary practice fit-out at 150 Amsterdam Ave. in Manhattan. Located within a prominent class A commercial building, the project was delivered on time, despite accommodating several design changes and landlord's requirement for a full FDNY approval prior to occupation.
