

**2024 Women in Construction: Angela Grippo, Emtec Consulting Engineers**

March 26, 2024 - Spotlights

Angela Grippo  
Electrical Engineer

“Angela plays an integral role in the electrical design process here at Emtec. She is thorough and dedicated to her career, specializing in power distribution design and fire alarm systems. Angela is a valuable member of our team and aims to please all of our clientele. We proudly recognize Angela as a Woman in Construction.” - Andrew Solano, Managing Partner at Emtec Consulting Engineers.

What recent project, accomplishment or award are you most proud of? A recent project I am most proud of is in Islandia, NY, owned by Onyx Equities. The project consists of 8 new warehouse buildings that amount to 1 million s/f of warehouse space. I designed the incoming electrical service to each building, and it is by far the largest project I've gotten to work on as well.

What do you like best about being a woman in the AEC industry? As a woman, I like standing out in the male dominated AEC industry. Your confidence is challenged daily to only make you a stronger force in this industry. I'm grateful for the opportunity to grow more confident each day.

What is your favorite building in New York? The Bloomberg Tower at 731 Lexington Ave., is my favorite New York building. Their complete innovative designs promote employee wellness throughout the workplace. They have a stairwell system, complete with spiral escalator, that encourages employees to be more physically active too.
