

Foos Fire, Inc. a Woman-Owned Enterprise and beacon of reliability and innovation in the industry

April 30, 2024 -

New York, NY In the realm of fire safety and protection, one company stands out for its unwavering commitment to excellence: Foos Fire, Inc. Established in December 2008, this Woman-Owned Enterprise (WBE) swiftly became a beacon of reliability and innovation in the industry. With WBE certifications in New York and Massachusetts, Foos Fire specializes in fire sprinkler systems, fire alarms, monitoring, inspection, and repair services.

Their website proudly proclaims their dedication to professionalism, hard work, integrity, and customer service. What sets Foos Fire apart from the competition goes beyond mere words on a webpage. It's their ethos, approach to every project, and genuine desire to forge long-term relationships with their clients. At the heart of Foos Fire's success lies a mixture of technological advancement, and a team of top fire safety experts. With over 75 years of collective experience, they have honed their craft to provide their clients with limitless resources.

Foos Fire doesn't rest on its laurels but embraces the company's continued progress at every turn. With creative solutions tailored to each client's needs, they constantly push the boundaries of what's possible in fire safety. This forward-thinking approach not only ensures the effectiveness of their resolutions, but also sets them apart as a leader in the field, making potential clients feel that they are choosing the right partner at the forefront of their trade.

This ever-evolving firm has continuously expanded through new initiatives. Foos' fire alarm model works excellently with its well-established fire sprinkler services. Experience has shown that Foos' creative approach to client care encourages business expansion. Bundling life safety packages

eliminates the need to work with two different businesses, significantly streamlining processes, accelerating production, and potentially offering considerable financial savings for Foos' customers.

Foos Fire stands out further in the fire protection industry, as one of only a few companies certified as a WBE in New York to fulfil both fire sprinkler and alarm needs, making them a unique and valuable partner. This certification not only reflects their dedication to diversity but also offers significant benefits to entities needing to meet participation goals for projects that have this requirement.

From modest beginnings, with a handful of employees and just under 80 fire sprinkler inspection accounts, Foos Fire has blossomed into a thriving team of over 75 employees, serving over 3,500 accounts in the Northeast. Having successfully completed nearly 900 installation and renovation construction projects, the company has established a reputation for excellence as a dependable source for fire protection.

With a dedicated staff that includes designers, safety managers, project managers, estimators, and more, Foos Fire has the expertise and workforce to tackle any project confidently and efficiently. Their focus remains firmly on the future as Foos Fire continues to grow and evolve.

The company is poised to become an even greater force in the fire safety space. Building on its past successes and embracing new opportunities, Foos Fire is ready to set new standards and redefine what it means to protect lives and property from the threat of fire.

After recently commemorating their 15th year in business, today, Foos services areas throughout the northeast, providing new installations, testing/inspections, and service & maintenance of fire sprinkler systems, fire alarm systems, and central station monitoring. Foos Fire, Inc. is more than just a fire protection company; it's a testament to the power of devotion, innovation, and genuine care for life safety.
