Manhattan, NY Extell Development Company's 50 West 66th St. – the 70-story luxury skyscraper – has reached 775 ft. in height, making it the tallest tower on the Upper West Side. Designed by architectural firm Snohetta, marking their first residential project in the United States, the landmark offers Central Park, Hudson River and skyline views, designed floor plans, and over 50,000 s/f of indoor and outdoor amenities.

50 West 66th St. is slated to welcome its first residents later this year with more than 50% sold.

“With little new construction inventory on the Upper West Side, and lack of buildings that speak to the caliber of 50 West 66th St., we have filled a void in the market that is clearly resonating with buyers,” said Gary Barnett, founder and chairman of Extell Development Company. “The demand for architecturally significant, high-end buildings is still strong in today’s market, and our success is proof.”
